

1. Write a program to determine the maximum of 3 numbers.
2. Write a program to accept number of days and print year, month and remaining days.
3. Write a program to swap the values of two variables.
4. Write a program that reads the percentage obtained by the students and determines and prints the class obtained by the student as per the following rules

Percentage	Class
0 - 39	Fail
40 - 59	Second class
60 - 79	First class
80 - 100	Distinction

5. Write a program to calculate the area of circle/rectangle/triangle.
C indicate circle ,
R indicate rectangle,
T indicate triangle.
use symbolic constant to define the value of pie.
6. Write a program that accept basic, HRA, and DA from the user and calculate total salary.
7. Using While,do..while and for loop print 1 2 3 4 510.
8. Print series 2, 4, 6, 8,.....n. (Using While,do..while and for loop)
9. Print series 2, 4, 16,.....n*n (Using While,do..while and for loop)
10. Write a program to calculate the average of a set of n given numbers.
11. Write a program to generate fibonnacci series.
12. Write a program to print the multiplication table.
13. Write a program to find a factorial of the entered number.
14. Write a program to print all the numbers and sum of all the integers that are greater than 100 and less than 200 and are divisible by 7.
15. Write a program to accept two numbers and perform basic operation of calculator (+,-,*,/).(Use switch...case)
16. Generate the following pattern:

1.

```
* * * * *
* * * * *
* * * * *
* * * * *
* * * * *
```

2.

```
*
* *
* * *
* * * *
* * * * *
```

3.

```
* * * * *  
* * * *  
* * *  
* *  
*
```

4.

```
* * * * *  
*       *  
*       *  
*       *  
* * * * *
```

5.

```
* * * * *  
* * * *  
* * *  
* *  
*
```

17. Write a program to find maximum element from 1-Dimensional array.
18. Write a program to sort given array in ascending order.
19. Given the two 1-D arrays A and B, which are sorted in ascending order. Write a program to merge them into a single sorted array C that contains every item from arrays A and B, in ascending order.
20. Write a program to add two matrices.
21. Write a 'c' program that reads in two matrices and multiply them. Display the resultant matrix.
22. Write a program to find element at given position from 2-Dimensional array.
23. Write a program to find string length.
24. Write a program that will input a string and count all occurrences of a particular word.
25. Write a program that will read a string and rewrite it in the alphabetical order.
26. Write a program to reverse the string.
