Programming - Python (Practical Assignment – I)

1. Write a python program to add two numbers.
2. Write a python program to find quotient and remainder.
3. Write a python program to find type of objects in your system.
4. Write a python program to read two numbers and display the greatest number.
5. Write a python program to check whether number is even or odd.
6. Write a python program to check whether a character is vowel or consonant.
7. Write a python program to find largest number among three numbers.
8. Write a python program to find all roots of a quadratic equation.
9. Write a python program to calculate sum of natural numbers.
10. Write a python program to check leap year.
11. Write a python program to find factorial.
12. Write a python program to generate multiplication table.
13. Write a python program to display fibonacci series. (eg. 0, 1, 1, 2, 3, 5, 8, 13, ...)
14. Write a python program to find gcd.
15. Write a python program to find lcm.
16. Write a python program to reverse a number.
17. Write a python program to calculate power of a number.
18. Write a python program to find binary value of a character.
19. Write a python program to display two separate strings in single line continuously.
20. Write a python program to check whether a number is palindrome or not.
21. Write a python program to check whether a number is prime or not.
22. Write a python program to display prime numbers between two intervals.
23. Write a python program to check armstrong number. (eg. $13^3 + 33^3 + 53^3 = 153$)
24. Write a python program to display armstrong number between two intervals.
25. Write a python program to display factors of a number.
26. Write a python program to calculate simple interest of the principle read by user.
27. Write a python programs to create pyramid and pattern.
28. Write a python program to make a simple calculator to add, subtract, multiply or divide
29. Write a python program to display Simple Number Triangle Pattern
30. Write a python program to display inverted pyramid of numbers
31. Write a python program to display inverted pyramid of descending numbers
32. Write a python program to display inverted pyramid of the same digit
33. Write a python program to display reverse pyramid of numbers
34. Write a python program to display inverted half pyramid number pattern
35. Write a python program to display pyramid of natural numbers less than 10
36. Write a python program to display reverse pattern of digits from 10
37. Write a python program to display connected inverted pyramid pattern of numbers
38. Write a python program to display even number pyramid pattern
39. Write a python program to display pyramid of horizontal tables

40. Write a python program to display pyramid pattern of alternate numbers
41. Write a python program to display mirrored pyramid (right-angled triangle) pattern of numbers
42. Write a python program to display equilateral triangle with stars (asterisk symbol)
43. Write a python program to display pyramid pattern of stars
44. Write a python program to display hourglass pattern program
45. Write a python program to display pascal's triangle program
